DECK

DESK TOP

DESK TOP:

Main desk top:

Light weight medium density (MDF) wood fiber top covered in leather, 60 mm thick. The sliding top allows access to a storage compartment equipped for wire management. The sliding mechanism acts on an extruded aluminium guide, with an inner polyethylene skid, fixed between top and beam. The slide and access to the storage compartment is lockable.

Meeting top :

- wood version: made of wood fiber in medium density (MDF), light weight and veneered in wood, 60 mm thick.
- glass version: in etched back-painted glass finish, 15 mm thick.

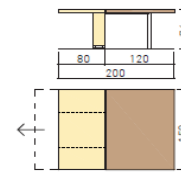

LEGS:

Composed by a structure upholstered in leather and equipped with two holes allowing the access of cables and by a base in varnished metal.

Desk leg: 200 mm thick in leather finish.

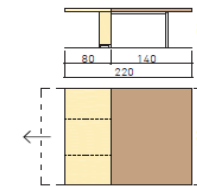

Meeting leg : in varnished metal.

DECK

WALL AND LEGS

Technical Wall

It consists of a leather frame equipped with two holes on the bottom that allow the access of cables and of a varnished metal base. Thickness 200 mm (in leather).

Metal leg

Tubular leg varnished in metal Nichel or Graphite

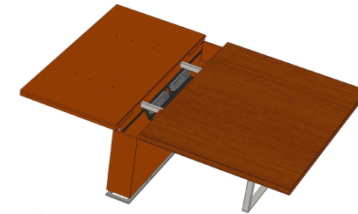

DECK

ELECTRIFICATION

Meeting desk is easily cabled by the rise of the cables through the technical wall. Access from above to the cable tray is made through the sliding desk top.

The tray is made of sheet metal and slides inside the compartment, which also acts as a container.

The sliding table mounts a soft seal that allows the passage of cables from the floor to the tray.
